Deliverable 4 — Three Letters of Recommendation

How to use these drafts (read first). Each letter is a *draft for the referee to review, edit and adopt as their own*. Send it to the referee together with her CV and SOP. Every fact in square brackets must be filled or confirmed by the referee: name, title, how long they have known her, course names, project title. Irish portals (Galway, UL, DCU, Trinity) usually **email the referee directly** and ask them to upload a signed letter on institutional letterhead from an official email address, so referees should expect that email. A letter must never be signed or submitted on a referee's behalf. The three letters are deliberately written in different voices; please don't merge them into one template.

Letter 1 — Academic: Undergraduate (B.Com)

Referee: [Dr./Prof. Full Name], [Head, Department of Commerce / Associate Professor of Commerce], Seshadripuram Institute of Commerce and Management, Bengaluru · **Angle:** quantitative grounding in accounting and taxation, examination performance, analytical discipline · **Voice:** formal, structured, evidence by subject

[Institution letterhead]

[Date]

To the Admissions Committee, [MSc International Accounting and Analytics, University of Galway]

Re: Recommendation for Ms. Bhumika Veerapura Siddagangappa

I write in strong support of Ms. Bhumika Veerapura Siddagangappa's application for postgraduate study. I have taught at Seshadripuram Institute of Commerce and Management for [__] years. I knew Ms. Bhumika throughout her Bachelor of Commerce (2017–2020), during which I taught her [Financial Accounting and Corporate Accounting] and supervised her [internal assessments / class presentations] in [Income Tax / Business Taxation].

Academic performance. Ms. Bhumika graduated with a CGPA of 8.43 on a 10-point scale, which places her among the strongest students of her batch of approximately [___]. Her record was consistent rather than uneven. She performed especially well in the quantitative core of the programme: Financial Accounting, Management Accounting, Business Finance and Taxation. These subjects demand both accuracy and the ability to follow a transaction through several statements, and she did both reliably.

Quantitative and analytical ability. In accounting she rarely lost marks on method; where she lost them at all it was on presentation, and she corrected that quickly once it was pointed out. In taxation she showed a quality I value highly in a commerce student: she wanted to know *why* a provision applied, not only how to compute it. In class discussions on computing total income and on set-off of losses, she regularly asked how the treatment would change under a different set of facts. That habit of testing the rule against the case is the foundation of good audit and compliance work.

Competitive achievement. During her undergraduate studies she was ranked 600th out of about 450,000 candidates in the All India COMEX Examination, a national commerce examination. That rank reflects preparation and command of fundamentals well beyond the syllabus.

Character. Ms. Bhumika is disciplined, punctual with submissions and respectful in debate. She also served for three years as a volunteer in the National Service Scheme and with the Youth Red Cross, which speaks to her sense of responsibility outside the classroom.

I understand she now wishes to specialise in accounting analytics and risk after several years at EY and Amazon. I consider this a natural step. Her undergraduate grounding in accounting and taxation is secure, and she has the analytical temperament to benefit from rigorous Level 9 study. I recommend her without reservation and would be glad to answer any further questions.

Yours faithfully,

Letter 2 — Academic: Postgraduate (MBA)

Referee: [Dr./Prof. Full Name], [Professor / Associate Professor], Department of Management Studies, Dayananda Sagar College of Engineering, Bengaluru, ideally her **MBA final-project guide** · **Angle:** strategic case analysis, operations research, peer leadership, intellectual maturity · **Voice:** reflective and narrative, built around one project

[Institution letterhead]

[Date]

Dear Members of the Admissions Committee,

I first met Bhumika Veerapura Siddagangappa in [the autumn of 2020], when she joined our MBA programme, and I later supervised her final project, ["*Project title — e.g. A study of … at …*"]. I am glad to recommend her. Over two years I watched her move from a capable commerce graduate to a student who could take an unstructured business problem and reason her way to a defensible answer.

Her cohort began the MBA during the disruptions of the pandemic, when much of the teaching moved online and students had to organise their own learning more than usual. Bhumika handled this well. In [Operations Research / Quantitative Techniques] she was one of the students who used the formal methods (linear programming, decision analysis, simple forecasting) properly instead of treating them as an exercise. In our case-discussion courses, especially [Strategic Management], she preferred to work out the numbers behind a case before offering an opinion on strategy. I remember her challenging a group conclusion in a [case name] discussion on the grounds that the cost data did not support it. She was right, and she made the point politely.

Her final project is the best evidence of her maturity. [Two or three sentences on the actual project: the question, the data she collected, the method, the finding. For example: "She collected primary data from __ respondents / analysed __ years of data from __, applied __, and concluded that __."] What I noticed most was her ability to narrow a broad topic into a question that could actually be answered, and her willingness to report limitations honestly.

She was also a natural organiser among her peers. In group assignments she often took on the coordinating role, dividing the analysis, setting internal deadlines and making sure the final submission read as one document rather than four. She did this without dominating, and her classmates trusted her judgement. She completed the programme with a CGPA of 7.82 out of 10.

I am not surprised that, after working at EY and Amazon, she has decided to specialise rather than pursue another general management qualification. The MBA gave her the strategic frame. Her career has shown her where she wants depth, in accounting analytics and risk. She has the intellectual maturity and self-discipline that a demanding one-year master's programme in Ireland requires, and I support her application with confidence.

With kind regards,

Letter 3 — Professional: Amazon GSRC

Referee: [Full Name], [Operations Manager / Compliance Program Manager / Quality Lead], Global Seller Risk & Compliance, Amazon, Bengaluru, her direct or skip-level manager · **Angle:** audit accuracy, defect triage, calibration leadership, handling ambiguity, cross-functional impact · **Voice:** concise, corporate, metric-led
Note: Amazon managers typically write references in a personal professional capacity. The referee should check internal guidance on letterhead use and on confidential details. Nothing below discloses internal systems or confidential data.

[Date]

To the Admissions Committee,

I am [Full Name], [title] in Amazon's Global Seller Risk & Compliance (GSRC) organisation in Bengaluru. Bhumika Veerapura Siddagangappa has worked in my team as a Senior Compliance Associate since July 2024, and I have [directly managed her / overseen her work] for [__ months]. I recommend her strongly for your master's programme.

What she does. Bhumika audits compliance and quality decisions across seller, product and regulatory-risk workflows. She tests whether a decision is supported by the evidence and consistent with our policies and SOPs, and she identifies where the process itself creates risk.

Audit accuracy and defect triage. Bhumika is one of the people I rely on when a defect pattern is unclear. She separates one-off errors from systemic ones, traces recurring defects to their root cause (documentation gaps, unclear SOP wording, inconsistent decision logic) and proposes corrective and preventive actions that actually get adopted. Her work on our product-compliance data and workflows improved data accuracy by 12%, and she has met 100% of her deadlines while improving project-completion efficiency by 12%.

Calibration and leadership. She leads calibration sessions where auditors and associates align on difficult cases. These sessions need tact, because she is often explaining why a colleague's decision was wrong. She does it with evidence rather than authority. She also mentors newer associates on complex cases, and the team's compliance-accuracy metrics improved by 15% during the period she was coaching them.

Handling ambiguity. Many cases do not fit an SOP neatly. Bhumika's instinct is to document the ambiguity, make a reasoned interim call, and escalate it so the policy gets fixed. Several of the SOP clarifications our team has adopted started with issues she raised.

Cross-functional impact. She works well with Operations, Quality and Policy partners. Her audit summaries for leadership are clear and decision-ready, and they reduced our review time by about 13%.

Areas for growth. The area where I would most like to see her grow is the one she is pursuing: deeper technical analytics, so that she can build the tests and models herself rather than relying on others to automate her insights. A specialist master's programme is the right next step for that.

In summary, Bhumika combines accuracy, sound judgement and the ability to bring colleagues with her. I recommend her without hesitation and am happy to be contacted.

Sincerely,

Referee briefing sheet (send to each referee with the draft)

Item	Detail
Applicant	Bhumika Veerapura Siddagangappa · bhumisidda@gmail.com · +91 91484 85773
Programmes	University of Galway MSc International Accounting & Analytics · University of Limerick MSc Insurance & Risk Management · DCU MSc International Accounting & Business · (possibly) Trinity MSc Operations & Supply Chain Management
What universities will ask	A short online form plus an uploaded letter: how long and in what capacity you have known her, a comparative rating (e.g. top 5% / 10% / 25%), and a signed letter
Timing	Portal requests will arrive in **November–December 2026**. Please upload within 7 days if possible.
Format	PDF on letterhead, signed, from an official email address. One letter can be reused across universities; only the addressee line changes.
Why specialisation	She already holds an MBA. These programmes add accounting-analytics and risk depth on top of her EY tax and Amazon compliance experience.

Important: please change any wording that does not reflect your own view or experience of her. An authentic letter carries more weight than a polished one.
